

SeniorEase Library — Brand Profile

Brand Name: SeniorEase Library **Website:** <https://seniorease.eu> **Platform:** Android (Google Play) **Price:** €4,99 one-time — no subscription

What we offer

SeniorEase Library is an Android app for collectors who want to know what they own before they buy. Scan the barcode of any vinyl record, book, CD, or console game and instantly see if it's already in your collection. No account required, no subscription, works fully offline. One-time purchase of €4.99 on Google Play.

Our customers

Passionate collectors aged 45–75 with large physical collections — vinyl enthusiasts, book lovers, CD collectors, and retro gamers. They regularly shop at record fairs, charity shops, and second-hand bookstores. Their biggest frustration: coming home with something they already own. They value simplicity, privacy, and tools that work without passwords or internet.

Where our customers are

Primarily the Netherlands, Belgium, Germany, and the UK. Secondary market: North America and Australia. Content is posted in English (TikTok/Instagram) and Dutch (Instagram/Facebook).

What we post about

The frustration and humor of buying duplicates — records, books, games you already own. How SeniorEase solves that with a quick barcode scan. The culture and joy of physical collecting (vinyl, retro games, bookshelves). App features shown through real collecting moments. Privacy and offline benefits — no account, no tracking, your data stays on your phone.

Brand voice

Warm, direct, no-nonsense. No tech jargon. No startup energy. Speaks to adults who love their hobby and want a tool that just works.
